※ For backlight function model, the input terminals are no. ●, ⑤ and the GND terminal is no. ②.

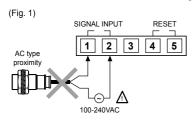

O Free voltage input

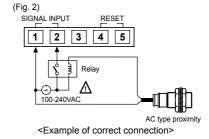

- AC type proximity sensor cannot be used as the source of count input signals.
- ※ Input terminal (♠, ♠) and reset terminal (♠, ♠) are insulated inside.
- * It is not possible to reset with AC power or DC power.
- When relay contact is used as the source of RESET signal, please use reliable contacts enough to flow 3VDC 5μA of current.

Input from AC type proximity sensor

In case of free voltage input type, do not connect AC proximity sensors instead of a switch as shown in the figure 1. It may cause malfunction due to sensor's leakage current. Connect a relay as shown in the figure 2.
